PROFESSIONAL SUMMARY

Software Developer Intern contributing to hospital HR and visitor systems through Java, Spring Boot, PHP, Laravel, SQL, and REST APIs. Built Employee Management, Recruitment, Leave Management, Payroll, and Dashboard modules, and improved access across devices with responsive interfaces using HTML, CSS, Bootstrap, JavaScript, and AJAX. Partnered with a four-member team on code reviews, debugging, and feature implementation to strengthen application stability and usability.

EDUCATION

Bachelor of Science in Information Technology

International Electronics and Technical Institute(IETI) | Sep 2022– June 2026

- relevant coursework: Object-Oriented Programming, Database Management, Software Engineering, Web Development, Systems Analysis & Design

PROFESSIONAL EXPERIENCE

Software Developer Intern

Quirino Memorial Medical Center(QMMC) | Feb 2026 – June 2026

- Collaborated with a four-member development team under supervisor guidance to develop QALINGA HR, contributing to the successful deployment of a Human Resource Management System currently used by the hospital's Human Resources Department.
- Developed core modules, including Employee Management, Recruitment, Leave Management, Payroll, and Dashboard features, while building responsive interfaces using HTML, CSS, Bootstrap, JavaScript, and AJAX, helping digitize HR operations and improve user experience across devices.
- Integrated RESTful APIs and collaborated with teammates and supervisors during code reviews, debugging, and feature implementation, improving application functionality, stability, and code quality.
- Contributed to the development of VPASS by implementing visitor registration, vehicle registration, pass generation, dashboards, search, and reporting features, supporting a more efficient visitor management process within the hospital.

PROJECT

Automated Payroll System(Capstone Project)

- Developed a Java-based payroll management system featuring employee management, attendance tracking, payroll computation, authentication, and automated pay slip generation, applying object-oriented programming and relational database design.
- Applied Object-Oriented Programming principles and relational database design to develop a maintainable payroll solution.

SKILLS

- **Programming Languages:** Java, PHP, JavaScript, SQL, HTML, CSS
- **Frameworks & Technologies:** Spring Boot, Laravel, Bootstrap, AJAX, REST API
- **Databases:** MySQL, SQL Server
- **Concepts:** Object Oriented Programming (OOP), MVC Architecture, CRUD Operations, Authentication, JPA/Hibernate
- **Tools:** Eclipse IDE, IntelliJ IDEA, Visual Studio Code, Postman
- **Version Control:** Git, GitHub
